Half Day Educational Program
3 and 4 year olds classes since 1970

Supportive Learning Environment

Our program is guided by a team of educated teachers who combine the traditional methods with the new cooperative approach to learning. Over the years we have developed a curriculum designed to...

- * Help your child develop a love of learning, discovery, and new experiences through play.
- * Stimulate and challenge your child with materials and activities suitable for their age and developmental level.
- * Foster social skills through interaction with peers and adults.
- * Develop your child's confidence, self esteem and independence.
- * Provide an atmosphere where Christian ideals of love and respect are demonstrated and practiced
- * Present opportunities to strengthen educational skills that develop a foundation for kindergarten, including math and reading readiness skills.

A happy and safe place to play and learn

At Little Elks Preschool, your child will have access to theme based units and activities, supervised by staff trained in early childhood education, and presented in a safe, hazard-free environment.

Both 3-year old and 4-year old programs are structured to encourage creativity and self expression through play. Sessions involve a combination of indoor and outdoor activities, including art, music, movement, literature and dramatic play.

Our facilities are designed to encourage your child to move safely between activities, while allowing exploration of the learning environment.

In recognition of the growing incidences of childhood allergies Little Elks Preschool is to be a nut-free environment.

Children of all races, religions and sex are welcomed as equals.
